

Comprehensive School Improvement Plan Update

2017-2018

Meeting Minutes

Purpose: The Pattonville School District is working with parents, students, community members, staff and area leaders to update its strategic plan with a series of CSIP (Comprehensive School Improvement Plan) meetings during the 2017-2018 school year. The updated plan will focus on ensuring all students become "success-ready graduates" and planning for and addressing any critical issues that may arise in the areas of facilities, safety, staffing and finances.

Committee: Extracurricular Involvement and Student Excellence

Committee task: Evaluate and make recommendations regarding how the district can support existing and future after school programming, so Pattonville students are prepared to participate in MSHSAA high school options.

Committee problem statements:

1. How do we ensure our existing elementary and middle school after-school programs are preparing students for MSHSAA high school options?
2. How do we facilitate club level and/or highly competitive and affordable programming in the Pattonville community?
3. What metrics are needed to determine if Pattonville High School has appropriate and comparable MSHSAA coaching/sponsor, program resources, and structures in place?
4. How are program playbooks and coaching/sponsor professional development at Pattonville High School impacting practice and results?

Date of Meeting: Sept. 5, 2017

Minutes from meeting:

- Presentation overviewing committee structure, organization of the problem statements, committee timeline, and strategies to complete the work was reviewed.
- Committee members were organized into three subgroups to review, discuss, and identify strategies/action steps to address guiding questions/statements based on the problem statements.
- Parent feedback survey data was reviewed regarding existing after-school programming at the elementary, middle, and high school level.

Work/research to be completed prior to next meeting:

- Committee members are reviewing and continuing to add feedback to the online work boards completed by each subgroup with the goal of developing preliminary recommendations at the November 15, 2017 meeting. The work completed by the three subgroups can be accessed at from the below links:
